

# OPTOCAM<sup>AHD</sup> SniperScope

## KEY FEATURES:

- / Compatible with a wide range of scopes
- / One-button operation with seamless scope viewing
- / Simultaneous recording while maintaining the scope view
- / Integrated AHD camera & DVR in screen with on-device focus control
- / Extended battery life .
- / Zero transmission for complete operational stealth
- / Lightweight, plug-and-play design

The OPTOCAM<sup>AHD</sup> SniperScope system, a combat proven equipment, was developed in collaboration with the Israeli defense force and is used by it and other special forces since.

OPTOCAM<sup>AHD</sup> SniperScope systems are an add-on product, recording directly through the sight eyepiece, and simultaneously recording and projecting the view on a screen.

The OPTOCAM<sup>AHD</sup> SniperScope enables the commander or instructor to analyze during and after trainees activity.

The OPTOCAM<sup>AHD</sup> SniperScope's recorded events enable a clear objective post mission debriefing.
